

Stella Doradus

TestTool PRO

Professional Cellular Survey Tool

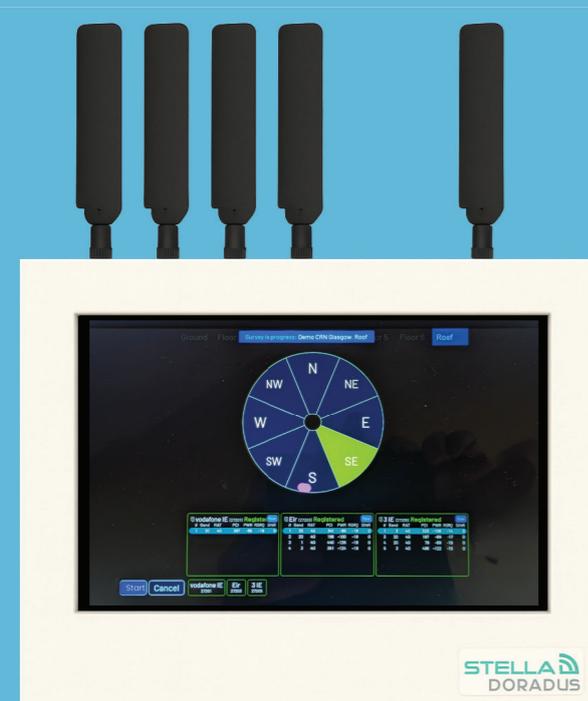

TT PRO

The TestTool is a cellular survey tool, designed specifically for cellular repeater installations. Spectrum mode, Cells mode and the ability to do professional surveys in-building at speed, make this tool an essential piece of test equipment.

- Spectrum analyser mode
- Cells mode (5X internal 5G modems)
- Site Survey Test report generator
- PDF plans survey
- Generate GSM/4G/5G installation plans on heatmaps
- Fast professional onsite surveys

REMOTE ASSISTANCE

Remote assistance with Stella Doradus engineer on site.

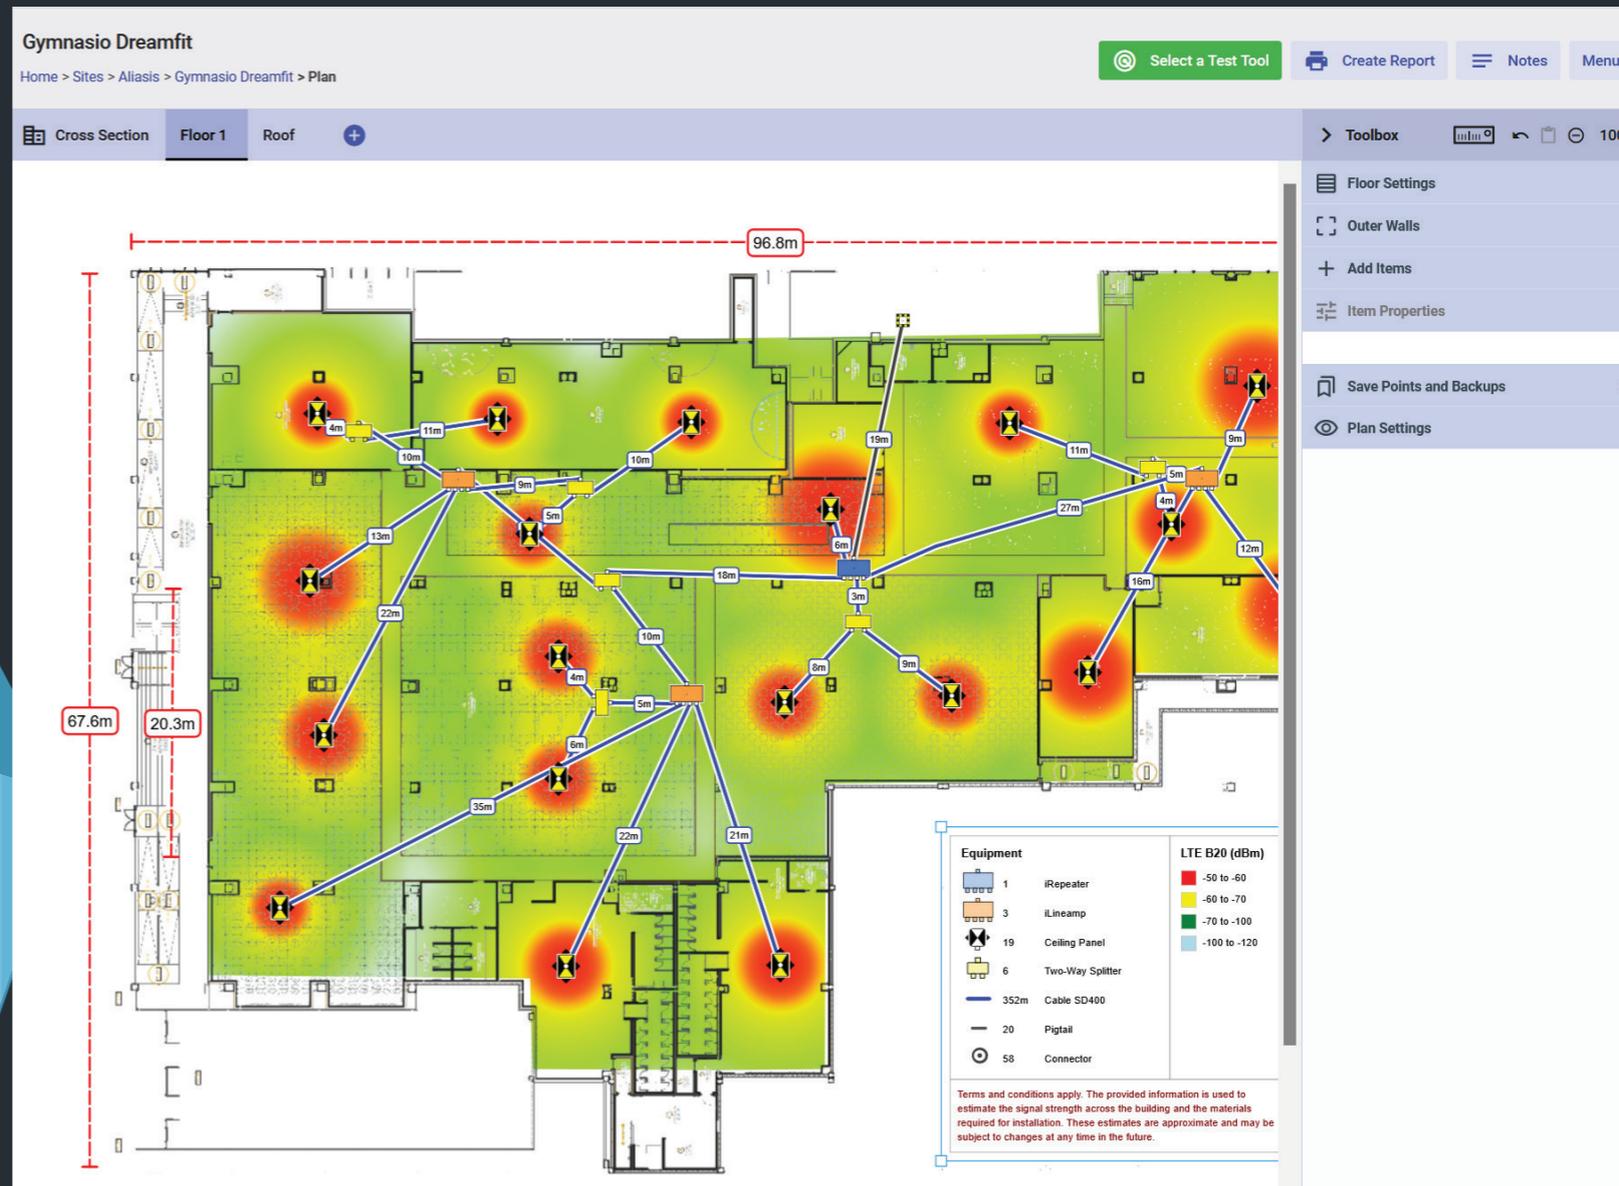

FAST SURVEYS

Fast and indepth surveys both inside and outside the building.

STELLACONTROL

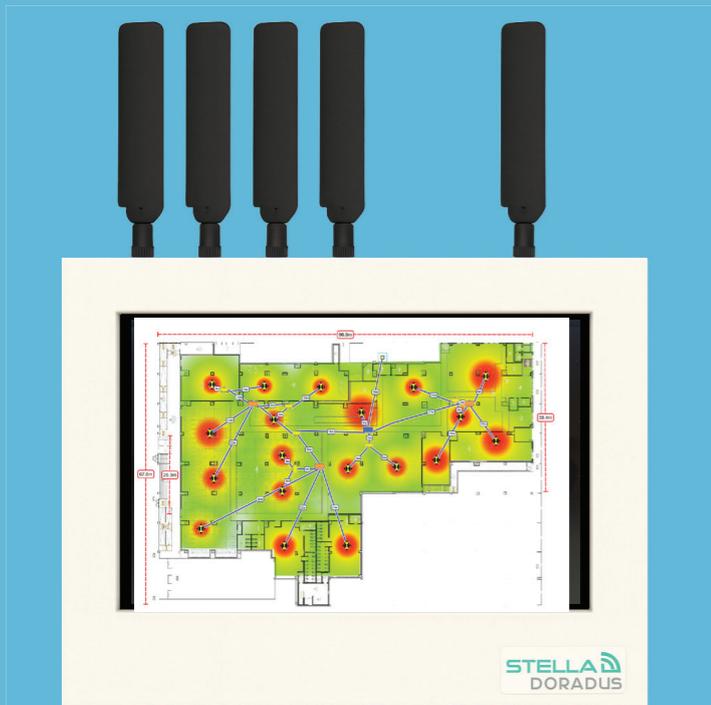

Sync your buildings on StellaControl to your TestTool. Automatically upload scans and photos.

STELLAPLANNER

The TestTool syncs to your building design on the StellaPlanner, our online antenna placement design tool. All surveys for a particular floor are linked to your design and can be printed out on the report generator in-built tool.

PDF plans for each floor, antennas and equipment, Survey scan data, heatmaps, photos on installation.....all in one place.
